

Limit your SKUs by using ONE UNIVERSAL ADHESIVE!

VERSAStick™

PREMIUM "GREEN" PRESSURE SENSITIVE FLOORING ADHESIVE

Introducing VersaStick!

Not only can the revolutionary VersaStick Adhesive be used for wood and LVT, it can also be used against the subfloor as well as the floor being laid - allowing contractors and builders to limit SKU's as most current jobs require two different adhesives.

The same trowel size can be used for the subfloor as well as laying the floor. This amazing product does not set or harden in it's container when exposed to the atmosphere; therefore, it can be used for multiple jobs!

And, as always with MP Global products, we strive to create products that are friendly to the environment.

FEATURES & BENEFITS

- "Green" Pressure Sensitive Adhesive
- Zero VOCs & Zero Solvents
- Superior Shear Strength
- High Initial Tack
- Spreads Easily
- Easy Clean Up When Wet
